8) Live Viewer is now installed and ready to launch.

9) LiveViewer can be accessed from the start menu. A shortcut can be created on the desktop or task bar for easier access.

2 - Using LiveViewer

1) Launch the application in the usual way.

2) Connect the desired product to the host computer via its update and control port.

3) Click 'Scan' to find the connected products and select the product by clicking on it and clicking the 'LiveView' Button or by double clicking the product.

4) A table will now be displayed with up to date real time information about the connected devices.
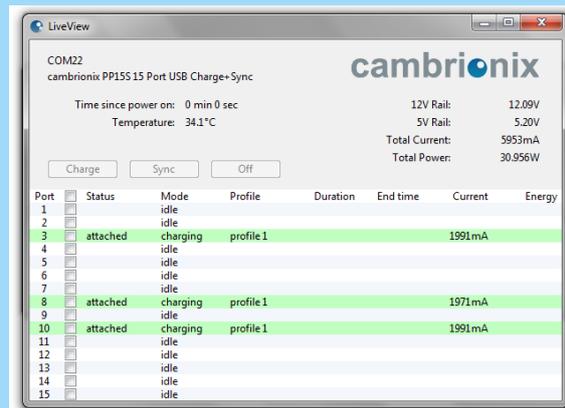

5) To select a port simply tick the box next to it. Tick the topmost box to select all ports.

6) Once the ports have been selected the port function can be changed to either 'Off', 'Sync' or 'Charge' mode. This can also be done by right clicking on the port's row.

Charge Mode - Charges the connected devices at the manufactures optimum rate
Sync Mode - Connects the devices to the host computer as if they were connected directly.
Off Mode - Turns the ports off, providing no current to the connected devices.
